WORK EXPERIENCE

Frontend Engineer

Deeporion Technology, Rajasthan, India

May 2024 - Present

- Developed essential website pages, including landing pages and authentication pages.
- Developed and optimized the "Leaves" section and the "Timesheet" for a HR Portal application using React.js enhancing the employee experience.
- Utilized Tailwind and Material UI. Redux to design and manage state for responsive and dynamic user interfaces, improving the overall user experience and application performance.
- Identified, debugged, and resolved multiple critical issues and UI/functional bugs in React.js applications, improving performance, user experience, and stability.

Software Engineer

Autope Payment Solutions, Rajasthan, India

Nov 2022 - Sept 2023

- Integrated ICICI Direct Net Banking, UPI2.0, UPIOTM, and Yes Bank into IRCTC's payment gateway "IPAY."
- Generated comprehensive reports using data from MongoDB and MySQL databases.
- Ensured a smooth payment flow for all integrated methods, optimizing the user experience.

PROJECTS

Dxyra - HR Portal, Deeporion Technology

- Developed the Leave Panel, enabling employees to apply for leave, view team leaves, and filter data by date and employee name. HR/Admin roles could manage team and organizational leaves and apply leave on behalf of any employee.
- Created the Timesheet Panel, allowing employees to log work hours for different projects, track time, and filter by date or employee name. HR/Admin roles had visibility over employees' timesheets, while employees could only access their own data.
- Implemented role-based access and filtering functionalities for both panels.
- Found and fixed multiple bugs in application, making them work better and improving the user experience.

E-commerce, Deeporion Technology

- Developed the UI for the e-commerce platform using React.js.
- Developed shopping cart features enabling users to add items, manage quantities, and place orders seamlessly.
- Created the product catalog section and implemented API integration to fetch catalog items and apply filters.
